Some benefits of soil testing:

- Increase productivity through identification of soil or nutrient factors that may be limiting plant growth
- Increase profitability through using fertilisers more efficiently; right fertiliser, right place, right time

Some benefits of forage testing:

- Increase profitability through understanding nutritional value of forage to allow for efficient expenditure on feeds
- Increase productivity through improved livestock feed efficiency

Costs for a simple pH, P, K and Mg soil test is around £8–£10 per field, but can vary depending on what other tests are included. PAAG – Professional Agricultural Analysis Group.

We have tried to include all companies but if you are not included on the list, please email liz.genever@ahdb.org.uk
